

MODEL: AH

品名：油壓虎鉗

型號：AH

產品說明：

- Body is made of high quality cast iron, which resists deflection or bending, and its sliding surface flame hardened and ground.
 - Jaws are made of special steel, which is hardened and ground.
 - With Hydra. Power Machine Vise, auxiliary equipment such as a hydraulic pump, hose and air compressor are no longer needed.
 - Hydra. Booster provides a steady clamping force against shocks and vibrations during the operations, since it fastens the work piece resiliently with an aid of the disc-springs mounted inside.
 - Clamping force may be freely adjusted with this base line as a guide. It magnifies a small force into an enormous clamping force by virtue of its unique Hydra. Booster incorporated.
- It makes possible 3-range jaw opening variation where maximum opening attained is 3 times as large as that of normal machine vises.
